# 1. Executive summary

Kwentra is a cloud-based, all-in-one hospitality management system aimed at independent hotels, resorts and small-to-mid-size chains in the Middle East and Africa. The brand launched around 2013–2014 out of Cairo under the company CloudInn (legal operating entity CLOUDINN FOR SOFTWARE S.A.E.; contracting entity Cloud Hospitality Tech Ltd, registered in Abu Dhabi Global Market). It is led by co-founder and CEO Mai Shalaby, with CTO Ahmed Toulan and VP Sales Loay Sherif, and employs roughly 35 people (directories list 11–50).

The product is sold as an ecosystem rather than a single PMS: Front Office (the mandatory core, marketed as 300+ features), Point of Sale with recipe management, Channel Manager, Booking Engine, Inventory & Procurement, plus add-ons for website building (Kwentra Sites), payments (Kwentra Pay via Paymob/Sympl), general accounting and Multi-Property. Since April 2026 the company has been pushing K-AI, a conversational operations assistant, and on 7 September 2026 it announced the acquisition of Reflectfy, an AI review-and-sentiment platform, to add reputation management.

Commercially, Kwentra does not publish prices. Contracts are either per-room-per-month or occupancy-based (pay per guest actually staying), with the Front Office module as the minimum. Terms are non-refundable, require 60 days' cancellation notice and carry no uptime SLA. Go-live is promised within 48 hours and training is delivered through a self-serve Help Center plus a dedicated Experience Manager.

Kwentra's strongest assets are its regional compliance depth (Egyptian Tax Authority e-invoicing, Ministry of Interior guest reporting, Saudi ZATCA/Shomoos/NTMP, Hijri and Gregorian reporting), a Red Sea and Saudi client roster of roughly 37 named properties or groups, a partner list of about 45 integrations, and an aggressive field marketing programme (hotel workshops, a Saudi roadshow, referral commissions). Its weaknesses are equally visible: only 7 public reviews (4.8/5 but ranked #57 of 357 PMSs on Hotel Tech Report), zero reviews on Capterra/GetApp, a visibly dated front-end stack (Django templates, Metronic 4.7.5, Bootstrap 3.0.2, jQuery 2.0.3), recurring complaints about dashboards and filtering, and opaque pricing.

**What this means for a similar project:** the market Kwentra serves is real and under-reviewed, the compliance integrations are the true moat, and a modern, transparent, mobile-first entrant with published pricing and an open API would attack exactly where Kwentra is thinnest. Section 14 details this.

## 2. Company profile & leadership

|                            |                                                                                                                                                                                                                                               |

| 2013–2014    | Company founded by hoteliers and technologists; product launch under the CloudInn name (Android package still net.cloudinn.managementapp) |
| 2018         | Channel Manager launched (ExploreTECH)                                                                                                    |
| 2020–2021    | kwentra Insights mobile app released (iOS copyright 2020–2021)                                                                            |
| Jan 2023     | “Empowering Hoteliers of Tomorrow” initiative for tourism/hotel students                                                                  |
| Feb 2023     | CEO and GCC partnerships head speak at Dubai’s first Hospitality Technology Leaders Forum                                                 |
| Mar 2026     | CEO attends ITB Berlin; publishes takeaways                                                                                               |
| Apr 2026     | K-AI operations assistant announced (blog 15 & 30 Apr)                                                                                    |
| Jun–Jul 2026 | K-AI workshop series across Sahl Hasheesh, Hurghada and Sharm El-Sheikh (SRNTY, Ivy, Amphoras, Dreams, EVC)                               |
| Aug–Sep 2026 | Saudi Arabia roadshow: Fanaya Hotel Jeddah, Sedra Hotels Madinah, Golden Tulip Al Shakreen Madinah                                        |
| 23 Aug 2026  | kwentra Insights app updated on Google Play                                                                                               |
| 7 Sep 2026   | Acquisition of Reflectfy (AI reputation management) announced; terms undisclosed                                                          |

### 3. Product suite — core modules

Kwentra sells six product areas plus add-ons. The Front Office module is contractually mandatory; everything else attaches to it. Feature lists below merge the product page, FAQ, Hotel Tech Report feature checklist and the ExploreTECH vendor listing.

#### 3.1 Front Office (core PMS)

| Area               | Capabilities described                                                                                                                                                                       |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Room Rack          | Drag-style rack for check-in/out, cleaning and maintenance status, add-on packages, deposits, upgrades; rooms can be set out-of-order (blocks sales on all channels) and back in order       |
| Dashboard          | Arrivals/departures, occupancy by room type, revenue and daily rate at a glance (reviewers ask for a better live-occupancy view)                                                             |
| Reservations       | Individual and group bookings, guest preferences/history, rates and upgrades, multiple folios with split-rate, hourly/day-use, overbooking control, connected rooms, market-segment tracking |
| Group blocks       | Block tracking, rooming-list import, group booking portal, batch charge posting, rolling release (ExploreTECH listing)                                                                       |
| Housekeeping       | Room status, housekeeping progress, task assignment                                                                                                                                          |
| Night audit        | Automated night audit (marketed as rare among PMSs); manual reconciliation remains optional                                                                                                  |
| Rates              | Dynamic pricing by availability/volume, derived rates, lead-day and length-of-stay restrictions, weekly/monthly rates, promo codes, geotargeted pricing module                               |
| Hostel mode        | Sell individual beds as separate reservations while keeping private-room option                                                                                                              |
| Guest journey      | Self check-in via tablet/kiosk (Ariane, TABHOTEL), digital registration and e-logbook, passport scanning (Samsotech, OpenTEC, Acuant, AdriaScan), pre-arrival and post-stay email automation |
| Offline resilience | Front Office caches activity locally during internet outages and syncs on reconnect                                                                                                          |
| Access control     | Per-user screen and report permissions; role-based dashboards; MFA listed by ExploreTECH                                                                                                     |
| Add-on packages    | Link activities and supplementary services for cross-sell/up-sell via Front Office, Booking Engine or Channel Manager                                                                        |

#### 3.2 Point of Sale & Recipe Management

- Real-time posting of F&B and outlet charges to the guest folio in Front Office; multiple payment methods.
- Kitchen instructions and allergy notes passed to the kitchen; touch-screen compatible; works with any receipt printer (no proprietary hardware).
- Recipe management deducts ingredients from stock automatically; revenue tracked by menu item; tax and accounting reports generated.
- Automatic offline mode during connectivity loss; cashier-level tracking (client testimonial).

#### 3.3 Channel Manager (launched 2018)

- Two-way sync of rates and availability; one setup for all channels; single-click rate updates across room types; stop-sell, length-of-stay and overbooking controls.
- Direct connections cited: Booking.com (43 languages), Expedia (70+ countries); via SiteMinder 400+ channels; also SmarthHOTEL, eZee Centrix (100+ OTAs), STAAH, Book Online Now (550+ integrations), RateGain (Three Corners), YieldPlanet, MyAllocator, eRevMax, Yanolja Cloud.
- Requires Kwentra PMS — not sold standalone. Channel-performance reporting included.

#### 3.4 Booking Engine

- Embeddable widget for the hotel website; availability auto-updated from Front Office; mobile-optimised; SSL.

- Promotional codes, sell rooms or beds, pre-arrival add-on services; online payment at booking via Adyen, Paymob and others.

### 3.5 Inventory Management & Procurement (Back Office)

- Multi-warehouse stock allocation and cross-warehouse availability; documented vs actual consumption comparison.
- Purchase-order creation with authorisation permissions and warehouse receiving workflow; procurement automation for high-volume groups (Maysan, Dar Al Eiman).

## 4. Add-ons, K-AI and the Reflectfy acquisition

| Add-on                    | What it is                                                                                                                                                                                                         | Notes                                                                                                                    |
|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|

| Mobile App (front office) | Listed for several Sinai clients (Tamra Beach, Sharm Reef, Club Reef, Labranda)                                                                                                                                    | Scope not documented publicly                                                                                            |

### 4.1 K-AI — operations assistant (announced April 2026)

K-AI is described as a personal assistant for hotel operations that staff address with plain-language commands or questions instead of navigating menus. Publicly listed capabilities: instant retrieval and analysis of operational data; real-time monitoring of inventory, bookings and revenue; detection of pricing exceptions (e.g. rooms sold below a threshold rate), VIP and returning-guest bookings and reservations with special conditions; execution of authorised actions such as applying stop-sell, adjusting pricing/yield controls and escalating issues to management in one click; proactive alerts on revenue or operational risk. Workshop coverage adds automated report generation and live sentiment tracking. Scope today is Front Office only; other modules are on the roadmap. No quantified performance claims are published.

Example prompts Kwentra uses in its own material: checking any date this month with fewer than five rooms available, or flagging any room booked below EUR 70 today.

### 4.2 Reflectfy acquisition (7 September 2026)

Reflectfy is an AI reputation-management platform combining review aggregation, sentiment analysis and AI insights, built by engineer Youssef Siam. Kwentra will fold it into the platform to connect operational performance with guest sentiment. No price or deal structure disclosed. Strategically this moves Kwentra into territory currently covered by its partner ReviewPro (Shiji) and signals a build-vs-partner shift toward owning the guest-feedback layer.

## 5. Technical architecture (observed)

Fingerprinted from the public login portal (manage.kwentra.com), vendor listings and the FAQ. No proprietary data was accessed.

|                                         |                                                                                                                                                                                                                                                                                                          |
|-----------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Hosting</b>                          | Google Cloud Platform, containerised deployment (FAQ; ExploreTECH). Company relies on Google's security standards plus periodic third-party audits                                                                                                                                                       |
| <b>Backend</b>                          | Python/Django — evidenced by csrfmiddlewaretoken, /account/login/?next=redirect pattern and /static/ layout on manage.kwentra.com                                                                                                                                                                        |
| <b>Web front end</b>                    | Server-rendered Django templates using the Metronic v4.7.5 admin theme, Bootstrap 3.0.2, jQuery 2.0.3 and Font Awesome 4.7 from cdnjs; Front Office app served at /frontoffice/#/home (hash-routed single-page app, framework not exposed on the login screen). No React, Vue or modern Angular detected |
| <b>Multi-tenancy</b>                    | Separate database schema per property; consolidated reporting through an external service layer; single sign-on across properties (ExploreTECH)                                                                                                                                                          |
| <b>Offline behaviour</b>                | Local caching in Front Office; automatic offline mode in POS                                                                                                                                                                                                                                             |
| <b>Mobile</b>                           | kwentra Insights — native/hybrid app on both stores; package id net.cloudinn.managementapp                                                                                                                                                                                                               |
| <b>API</b>                              | “Open API” for custom integrations is claimed by ExploreTECH; no public developer portal or documentation found                                                                                                                                                                                          |
| <b>Security &amp; compliance claims</b> | GDPR-aligned processing (T&Cs); ExploreTECH lists SOC I & II, MFA, encryption, vulnerability assessments <b>[unverified — not repeated on kwentra.com]</b>                                                                                                                                               |
| <b>Scale claim</b>                      | “Supports 500+ properties” (ExploreTECH) <b>[unverified]</b>                                                                                                                                                                                                                                             |
| <b>Release cadence</b>                  | Weekly updates (Multi-Property blog); one reviewer reports package-management regressions after updates                                                                                                                                                                                                  |

## 6. Pricing model & commercial terms

Kwentra publishes no price list. Every directory (Hotel Tech Report, Capterra, GetApp, Software Advice) shows “contact vendor”. The FAQ refers to a pricing calculator but none is exposed on the public site; the Get-Started page is a demo-booking form only (email, country, calendar slot). The terms and conditions, however, disclose the structure:

| Term                  | Detail (from kwentra.com/terms-and-conditions and FAQs)                                                                                                                                                                                                                   |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Pricing models        | (a) Per-room-per-month fixed subscription; (b) occupancy-based — fee varies with guests actually in-house, marketed for seasonal properties (“only pay based on the number of guests”). Occupancy-based can result in zero charge for a closed or under-performing period |
| Minimum scope         | Front Office module must be included in every subscription                                                                                                                                                                                                                |
| Implementation fee    | Listed by ExploreTECH (amount not disclosed); not mentioned in T&Cs                                                                                                                                                                                                       |
| Switching models      | Allowed only when the current subscription term expires                                                                                                                                                                                                                   |
| Billing               | Card on file charged through the term, or invoice: per-room fees payable net 30 days; occupancy-based invoiced no later than 45 days after period start. Fees exclude VAT/taxes                                                                                           |
| Upgrades / downgrades | Upgrades pro-rated to next billing date; downgrades limited, no refunds, effective at term end                                                                                                                                                                            |
| Refunds               | All payment obligations non-cancellable; all amounts non-refundable                                                                                                                                                                                                       |
| Cancellation          | Written notice 60 days or more before subscription expiry; data permanently deleted from backups and logs within 30 days of termination                                                                                                                                   |
| Non-payment           | Notice, then suspension possible 10 days later; re-activation fees may apply                                                                                                                                                                                              |

| Term               | Detail (from <a href="https://kwentra.com/terms-and-conditions">kwentra.com/terms-and-conditions</a> and FAQs)    |
|--------------------|-------------------------------------------------------------------------------------------------------------------|
| Vendor termination | Kwentra may suspend or terminate accounts for any reason at any time                                              |
| SLA / uptime       | None. Warranty disclaimer: no guarantee of uninterrupted or error-free operation                                  |
| Liability          | No liability for lost profits or indirect/consequential damages; not responsible for third-party-caused data loss |
| Data protection    | GDPR-style processing; data retained as long as necessary for the service; five-year confidentiality              |
| Governing law      | ADGM (Abu Dhabi Global Market), UAE; CISG excluded                                                                |
| Free trial         | Capterra lists a free trial as available; Software Advice says none — <b>[conflicting]</b> . Demo is free         |

## Market context for what Kwentra likely charges

Industry benchmarks for cloud PMS in 2026 put per-room pricing at roughly USD 4–15 per room per month, flat-fee tiers at USD 50–95 (entry), 150–300 (mid) and 400–600+ (advanced), setup/onboarding at USD 500–2,000, and payment processing at 1–3% plus a per-transaction fee. Hotel Tech Report lists starting prices for Kwentra's main global alternatives at USD 500–1,200 per month (Section 13). Kwentra's occupancy-based option and its Egyptian-pound client base suggest it prices well below the global tier — but no Kwentra figure is public.

## 7. Onboarding, support & localisation

|                            |                                                                                                                                                                                                                                                             |
|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Go-live</b>             | Ecosystem provisioned within 48 hours of registration; data migration from previous systems offered                                                                                                                                                         |
| <b>Setup method</b>        | Dedicated Experience Manager runs a kick-off and customised plan; template tax and pricing configurations pre-loaded and editable                                                                                                                           |
| <b>Training</b>            | Self-serve Help Center with interactive guides and videos on every screen; 30-minute walkthrough per module; one-to-one follow-ups; classroom training discouraged as disruptive and costly (directories nonetheless list in-person, webinars, live online) |
| <b>Support</b>             | 24/7 support staff; dedicated Experience Manager per client; 24-hour response commitment; channels: chat, email, phone, knowledge base; regional office-hours support in Middle East & Africa                                                               |
| <b>Languages</b>           | FAQ says seven languages but lists six: English, Arabic, Dutch, French, Spanish, Portuguese; ExploreTECH lists English and Arabic only; app store: English                                                                                                  |
| <b>Hardware</b>            | Browser only (Chrome/Firefox recommended); works on mobile data; POS uses any receipt printer                                                                                                                                                               |
| <b>Currency &amp; tax</b>  | Multi-currency; any currency via chosen payment gateway; highly configurable tax definitions per country                                                                                                                                                    |
| <b>Reporting calendars</b> | Financial reports in both Hijri and Gregorian calendars                                                                                                                                                                                                     |

## 8. Regulatory & compliance integrations

This is Kwentra's most defensible differentiator against global PMS vendors, and the area a new entrant must budget for first.

| Market       | Requirement                                                         | Kwentra implementation                                                                                                                                                |
|--------------|---------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Egypt        | Egyptian Tax Authority (ETA) e-invoicing / e-receipt                | "ETA integration" or "ETA compliance" listed for most Egyptian clients (Mosaïque, Tamra, Amphoras, Sharm Reef, Club Reef, Labranda, Gemma, Caesar Bay, Three Corners) |
| Egypt        | Ministry of Interior / Ministry of Internal Affairs guest reporting | Automated reporting cited for Three Corners Hotels                                                                                                                    |
| Saudi Arabia | ZATCA e-invoicing (Fatoora platform)                                | Direct integration: instant tax invoices and credit notes at checkout; instant VAT reports                                                                            |

| Market       | Requirement                                                      | Kwentra implementation                                                                |
|--------------|------------------------------------------------------------------|---------------------------------------------------------------------------------------|
| Saudi Arabia | Shomoos (security guest-data system)                             | Automated secure transmission of guest data and reports; removes manual entry         |
| Saudi Arabia | National Tourism Monitoring Platform (NTMP), Ministry of Tourism | Real-time automatic submission of guest data and required reports                     |
| Saudi Arabia | ZTCA regulations (as listed for Velar Inn)                       | Compliance flagged on client page                                                     |
| Qatar        | Border/security and ID                                           | SITA iBorders, Opentec passport scanning, SALTO communications at The Grand Lux Hotel |
| Region       | Hijri calendar reporting; Arabic UI                              | Native in Multi-Property reporting and UI                                             |
| EU           | GDPR                                                             | Referenced in terms; ReviewPro/DigitalGuest partners are EU-based                     |

## 9. Integration partner ecosystem (~45 named)

From the Partners page, client pages, Hotel Tech Report (24 listed) and ExploreTECH (19 listed). Hotel Tech Report counts 18 verified partners versus Hotelogix's 25.

| Category                              | Partners                                                                                                                                                                            |
|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| OTAs & distribution                   | Booking.com, Expedia, Hotels.com, SiteMinder (400+ channels), SmartHOTEL, eZee Centrix, STAAH, Book Online Now, RateGain, YieldPlanet, MyAllocator, eRevMax, Yanolja Cloud Solution |
| Payments                              | Adyen, Ingenico, Paymob, Sympl (BNPL), Kashier, DPO Group, CCV                                                                                                                      |
| Guest experience, upsell & reputation | Oaky (by Plusgrade), ReviewPro (Shiji), DigitalGuest, WeBee, MyStay, James & Rita (restaurant, guest app, guest manager, maintenance); Reflectfy (acquired)                         |
| Kiosks & self check-in                | Ariane (Allegro v7 cloud), TABHOTEL                                                                                                                                                 |
| Door locks & access                   | SALTO Systems, Hotek, VingCard (Assa Abloy), dormakaba; electronic locks at Three Corners                                                                                           |
| ID / passport scanning                | Samsotech, OpenTEC, Acuant, AdriaScan                                                                                                                                               |
| Telecom, spa, facilities              | Mitel, LOGICWARE (Egypt), TNG spa/fitness                                                                                                                                           |
| Accounting / ERP                      | Xero, QuickBooks, Infor SunSystems                                                                                                                                                  |
| Revenue management                    | Hotel Lab (dynamic pricing, competitor tracking)                                                                                                                                    |
| Security / government                 | SITA iBorders (Qatar), ZATCA Fatoora, Shomoos, NTMP, Egyptian Tax Authority                                                                                                         |

## 10. Client base by country

Thirty-seven named clients or groups appear on the Clients page and in 2026 news. Egypt dominates, concentrated on the Red Sea and Sinai coasts; Saudi Arabia is the growth market (Makkah/Madinah pilgrimage hotels). Module mix per client shows Front Office is universal, Channel Manager is the most common attach, and POS/Back Office attach mainly at resorts and groups.

### Egypt (18)

| Client                                          | Location                       | Modules / integrations                                                                                                              |
|-------------------------------------------------|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| Three Corners Hotels (4+ resorts, 1,700+ rooms) | Marsa Alam                     | Front Office, payment gateway, RateGain channel manager, advanced reporting, electronic locks, ETA + Ministry of Interior reporting |
| Tropitel Hotels & Resorts                       | Sahl Hasheesh, Dahab, Hurghada | PMS; front-of-house optimisation; 2026 expansion                                                                                    |
| Amphoras Hotels (Beach, Blu, Aqua)              | Sharm El-Sheikh                | Front Office (ETA), Back Office, Channel Manager, Kwentra Pay; Booking.com, Expedia; K-AI workshop Jul 2026                         |
| Strand Beach & Golf Resort                      | Taba                           | Front Office, POS, Channel Manager, Oaky, ReviewPro                                                                                 |
| Mosaique Beach Resort                           | Taba                           | Front Office (ETA), POS, Channel Manager, Oaky, ReviewPro                                                                           |
| Tamra Beach Resort                              | Sharm El-Sheikh                | Front Office (ETA), Mobile App                                                                                                      |
| Sharm Reef Hotel                                | Sharm El-Sheikh                | Front Office (ETA), Mobile App                                                                                                      |
| Club Reef Resort                                | Sharm El-Sheikh                | Front Office (ETA), Mobile App                                                                                                      |
| Labranda Sharm Club Resort                      | Sharm El-Sheikh                | Front Office (ETA), Mobile App                                                                                                      |
| Time Coral Nuweiba Resort                       | Nuweiba                        | Front Office, Back Office, Channel Manager (SiteMinder), POS                                                                        |
| Gemma Resort                                    | Marsa Alam                     | Front Office (ETA), Back Office, Channel Manager                                                                                    |
| Onatti Beach Resort                             | El Quseir                      | Front Office, Back Office, POS, direct booking, Channel Manager, Kwentra Sites                                                      |
| Lagoonie Lodge / Eish Baladi                    | Hurghada                       | Front Office, POS, Back Office, Channel Manager                                                                                     |
| Caesar Bay Resort                               | Marsa Matrouh                  | Front Office (ETA), Back Office, Channel Manager                                                                                    |
| Stay Inn Hotels                                 | Giza                           | Front Office, Back Office, Channel Manager                                                                                          |
| Pyramid Edge Al Haram                           | Giza                           | Front Office, Channel Manager                                                                                                       |
| Parkside Avenue (serviced apartments)           | Heliopolis, Cairo              | Front Office, Back Office, direct booking, Channel Manager (SiteMinder), POS, Kwentra Pay, Kwentra Sites                            |
| Ghrghar Towers (furnished towers)               | Nasr City, Cairo               | Front Office                                                                                                                        |

2026 K-AI workshop / partnership prospects in Egypt: SRNTY Hotels (Sahl Hasheesh), Ivy Hotels & Resorts, Dreams Hotels Group and EVC Resorts (Sharm El-Sheikh) — announced as partnerships or workshops, not confirmed on the Clients page.

### Saudi Arabia (6) — the growth market

| Client                                                   | Location                | Modules / notes                                                                        |
|----------------------------------------------------------|-------------------------|----------------------------------------------------------------------------------------|
| Maysan Group (20 hotels, 5,000+ rooms)                   | Makkah, Madinah         | PMS, POS, Back Office; high-volume services, inventory automation, financial reporting |
| Dar Al Eiman Al Haram (SERB Group, 3,000-room portfolio) | Makkah / Madinah        | PMS, POS, Back Office; billing, inventory, unified accounting                          |
| Sadaa Hospitality Group (7 properties)                   | Makkah, Madinah, Riyadh | PMS, Channel Manager                                                                   |

### Who reviews Kwentra

Six of seven Hotel Tech Report reviews are from Egypt and one from Sierra Leone; property sizes split between 50–74 rooms and 200–499 rooms; roles include owners, general managers, IT managers, chief accountants and rooms-division managers. Segment recommendation rates: resorts 81%, boutique 67%, luxury/branded/hostel/budget 100% (tiny samples).

### What reviewers praise

- 24/7 support and responsive, professional team during pre-opening and live operations.
- Fast implementation and easy onboarding; cloud access from anywhere.
- All-in-one scope — front office, back office, POS, channel manager and website in one bill; consolidated financial control.
- Comprehensive reporting; smart integrations with channel managers and payment systems.
- Willingness to co-develop and customise features around a client's objectives.

### What reviewers criticise

- Dashboard does not show live occupancy the way managers want; limited filtering options.
- One critical review: room-category presentation issues left unresolved; package management broke after updates.
- Hotel Tech Report's own verdict in head-to-heads (vs Hotelogix, 246 reviews): Kwentra is “suitable for properties requiring legacy-system integration” but has too little validation data. Category rankings by size: small #68, mid #50, large #29 — i.e. relatively stronger with large properties.

Differentiators Hotel Tech Report credits to Kwentra over Hotelogix: an on-premise deployment option, lobby-kiosk functionality, employee messaging and automated reminders.

## 12. Go-to-market, sales channels & marketing

| Channel      | Mechanics                                                                                                                          |
|--------------|------------------------------------------------------------------------------------------------------------------------------------|
| Direct sales | Free demo booked through a calendar form; VP Sales plus GCC partnerships head; Experience Managers handle onboarding and retention |

| Channel            | Mechanics                                                                                                                                                                                                                                                     |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Referral programme | USD 300 per closed deal for sharing a personal referral code (hoteliers, consultants, restaurateurs). Paid quarterly, max four quarterly payments per referred contract, first payment ~30 days after first full quarter; tiered by contracts signed per year |
| Kwentra Champion   | 10% commission on first-year revenue for actively pitching properties; larger properties pay more                                                                                                                                                             |
| Reseller network   | Global reseller programme with negotiated commission; onboarding via sales manager                                                                                                                                                                            |
| Field marketing    | On-site AI/K-AI workshops at hotel groups (Sahl Hasheesh, Hurghada, Sharm El-Sheikh, Jun-Jul 2026); Saudi Arabia roadshow (Jeddah, Madinah, Aug-Sep 2026); "Tech Hospitality for IT Leaders" workshop                                                         |
| Events             | ITB Berlin (2026), Hospitality Technology Leaders Forum Dubai (2023)                                                                                                                                                                                          |
| Content            | Blog (~2 posts/month in 2026: all-in-one PMS, real-time reporting, multi-property, Saudi compliance, K-AI, sustainability, high-season prep, digital guest journey) and a news feed of client wins                                                            |
| Education          | "Empowering Hoteliers of Tomorrow" programme training tourism/hotel students on cloud PMS (talent pipeline and future buyers)                                                                                                                                 |
| Partner listings   | Hotel Tech Report, ExploreTECH (UAE marketplace), Ariane, SiteMinder etc. — integration marketplaces used as lead sources                                                                                                                                     |
| Messaging pillars  | Increased revenue · Operational efficiency · Cost-effectiveness · Guest loyalty; "fastest-growing cloud PMS in MENA"; "save 4 hours/day"; "up to 70% lower IT cost"                                                                                           |

## 13. Competitive landscape & price benchmarks

Hotel Tech Report's alternatives list for Kwentra, with published starting prices. HOTELTIME is named the Middle East category leader; Cloudbeds leads small hotels globally and Mews leads mid/large.

| Vendor            | HT Score | Reviews | Starting price    | Positioning                                                                  |
|-------------------|----------|---------|-------------------|------------------------------------------------------------------------------|
| Cloudbeds         | 100      | 1,265   | USD 600 / month   | Growth engine for ambitious hoteliers; #1 small hotels, North America & APAC |
| Mews              | 99       | 890     | USD 900 / month   | Operating system for modern hotels; leads Europe and mid/large               |
| Stayntouch        | 91       | 391     | USD 800 / month   | Personalised setup support                                                   |
| HOTELTIME         | 89       | 549     | USD 600 / month   | Mobile cloud access; Middle East leader                                      |
| Clock PMS+        | 88       | 329     | USD 600 / month   | Multi-operation handling                                                     |
| RMS Cloud         | 88       | 322     | —                 | Built-in channel integration                                                 |
| ThinkReservations | 87       | 400     | USD 500 / month   | Live support, training videos                                                |
| WebRezPro         | 82       | —       | —                 | Tape chart, fast staff onboarding                                            |
| Hotelogix         | 82       | 246     | Contact sales     | 4.9/5; 25 partners; strong in small/mid; India-based, active in MENA         |
| RoomRaccoon       | 79       | —       | —                 | Yield rules                                                                  |
| Shiji Group       | 74       | 36      | USD 1,200 / month | Enterprise, multi-window                                                     |
| Kwentra           | 0 (n/a)  | 7       | Contact sales     | 4.8/5; 18 partners; MENA compliance depth                                    |

### Regional and local competitors relevant to an Egyptian launch

- **ComSyS Software** (Egypt, founded 1984, ~68 staff): legacy hospitality/restaurant/retail vendor with cloud and on-premise options, channel manager, booking engine, housekeeping app; integrations M3, RateGain, Blastness, eRevMax; zero public reviews.
- **Oracle OPERA / OPERA Cloud**: incumbent in large branded Red Sea resorts; expensive, the system most independents want to leave.

- **eZee Absolute / Yanolja Cloud, Hotelogix, Cloudbeds, HotelRunner, Protel, Mews:** global cloud PMSs with MENA presence and published or semi-published pricing; several appear as Kwentra channel-manager partners (eZee Centrix, Yanolja) — meaning they are both partner and competitor.
- **Odoo, Smart Order, Profitroom, HotelRunner:** buying Google Ads on Kwentra's own brand search terms (visible as sponsored results on the query you shared).

Pricing benchmarks (industry, 2026)

| Cost element                   | Typical range                                                                               |
|--------------------------------|---------------------------------------------------------------------------------------------|
| Cloud PMS per room per month   | USD 4 – 15 (e.g. 20 rooms at USD 8 = USD 160/month)                                         |
| Flat-fee tiers                 | Entry USD 50-95 · Mid USD 150-300 · Advanced USD 400-600+ per month                         |
| Setup / onboarding             | USD 500 – 2,000; on-site training USD 850–1,500 per day; custom config USD 150-300 per hour |
| Integration fees               | USD 200 – 500 per month                                                                     |
| Payment processing             | 1-3% + USD 0.15-0.30 per transaction                                                        |
| On-premise licence (legacy)    | USD 20,000 – 100,000+ upfront; USD 10,000 – 30,000 annual maintenance                       |
| Small hotel (<30 rooms) all-in | USD 50 – 200 per month                                                                      |
| Mid-size (30-100 rooms) all-in | USD 200 – 800 per month                                                                     |

## 14. Gaps and opportunities for your project

Kwentra has proven that Red Sea and Saudi independents will buy a regional cloud PMS. The data above shows where it is exposed. Each row pairs an observed weakness with the opening it creates.

| Observed at Kwentra                                                                                | Opportunity for a new entrant                                                                                                                                                               |
|----------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Opaque pricing — no public list, quote-only, non-refundable, 60-day notice, no SLA                 | Publish transparent per-room and occupancy-based tiers in EGP/SAR/USD with a real uptime SLA and monthly cancellation. Price transparency alone is a lead-generation weapon in this segment |
| Dated front-end stack (Bootstrap 3.0.2, jQuery 2.0.3, Metronic 4.7.5) and a hash-routed legacy app | Modern responsive web app (React/Vue) with true mobile front-desk and housekeeping apps — reviewers already ask for better dashboards and filtering                                         |
| Dashboard and filtering complaints; regressions after weekly updates                               | Invest in a live occupancy/rate dashboard, saved filters and staged releases with release notes; make stability a selling point                                                             |
| Only 7 public reviews in 12+ years; zero on Capterra/GetApp                                        | Bake review collection into onboarding and support closure; 30 verified reviews would out-rank Kwentra on every directory                                                                   |
| “Open API” claimed but no public developer docs                                                    | Public, documented REST/webhook API from day one; attracts channel managers, RMS, locks and local fintechs to integrate with you instead                                                    |
| Training is deliberately online-only; 24-hour response commitment                                  | Offer optional on-site go-live for resorts (your operational background is an asset here) and a local-language WhatsApp support line                                                        |
| Compliance moat: ETA, Ministry of Interior, ZATCA, Shomoos, NTMP                                   | Non-negotiable to match. Sequence: Egypt ETA e-receipt/e-invoice + guest reporting first, then Saudi ZATCA/Shomoos/NTMP for the Umrah market. Hijri/Gregorian dual reporting is expected    |
| Guest-facing layer thin: reputation and upsell were partner-supplied until the Reflectfy purchase  | Build guest messaging (WhatsApp), digital check-in, upsell and review requests natively; this is where entertainment/activities booking — your domain — plugs in as a differentiator        |
| Activities and add-on packages exist but are basic (link services to reservations)                 | A real activities/entertainment module: schedules, capacity, animation-team programmes, guest sign-ups, resort programme publishing — no MENA PMS does this well                            |
| Growth lever is field workshops and referral commissions (USD 300 / 10%)                           | Same playbook works: hotel-group workshops on the Red Sea, referral network among GMs and F&B managers, reseller deals with local IT integrators (e.g. LOGICSWARE-type firms)               |
| Multi-property is a headline feature, sold to 20-hotel groups                                      | Do multi-property from the start (schema-per-property or row-level tenancy) so you are not rebuilding for the first group client                                                            |
| POS with recipe costing and procurement is a genuine strength                                      | Match F&B stock deduction and PO workflow — resorts on all-inclusive plans treat this as core, not an add-on                                                                                |

Suggested reading order for your team: Section 3 (feature parity checklist), Section 8 (compliance scope), Section 9 (integrations to prioritise), Section 6 (contract terms to beat), Section 13 (pricing corridor).

## 15. Caveats and unverified claims

- **Founding year:** Kwentra's own boilerplate says 2013; ExploreTECH lists 2014; Crunchbase hides the date. Treat as 2013–2014.
- **Headquarters:** Cairo (three directories, app-store publisher, Facebook/Giza) vs Abu Dhabi (Hotel Tech Report; ADGM legal entity). Most likely Egyptian operations with a UAE contracting company.
- **Headcount and revenue:** 35 staff and under USD 5m revenue are third-party estimates.
- **SOC I & II, MFA, 500+ properties, SLA guarantees:** appear only in the ExploreTECH vendor listing and are contradicted by the T&Cs' lack of any SLA; not on kwentra.com.
- **Feature counts:** “300+” Front Office features and “800+ capabilities” are marketing figures; the Hotel Tech Report checklist shows about 16 feature categories.
- **Languages:** FAQ claims seven but names six; ExploreTECH says two.
- **Free trial:** Capterra says yes, Software Advice says no.
- **2026 partnerships** (Dreams, EVC, SRNTY, Ivy, Fanaya, Sedra, Golden Tulip) are announced as workshops or K-AI partnerships; they are not on the Clients page and may be prospects.
- **Help Center** (kwentra.supporthero.io) is login-gated, so detailed screen-level documentation could not be reviewed; feature depth is inferred from marketing and directory listings.
- **Google search page:** the shared link's AI Overview and sponsored results were used only to identify sources; sponsored competitors are noted in Section 13.
